Phone:  
**+90 542 207 97 52**

Date of birth:  
**October 20, 1991**

Address:  
**Istanbul / Turkiye**

Military Status:  
**Done**

Driver's Licence:  
**None**

Graduation Status:  
**Cumhuriyet University –  
Computer Programming**

Graduation GPA / Year:  
**3.15 / 4  
February 2014**

## Summary

I have been actively developing Android mobile applications using Java and Kotlin languages, as well as current technologies like Compose, since 2014. I have applications published on [Google Play](#) and [Huawei App Gallery](#)

In 2017, I provided Android Development training to 30 participants for 3 months at Istanbul Küçükçekmece Municipality's Entrepreneurship and Innovation Center (KÜGİM). I also have a book titled "[Neymiş Bu Yazılım?](#)" with 225 pages covering 182 topics to guide anyone researching software.

For more detailed information about me, my projects, and my contact links, you can visit [muratyuksektepe.com](http://muratyuksektepe.com).

## Work Experience

Company	Position	Date
<b>LOODOS Teknoloji A.Ş.</b> <a href="http://loodos.com.tr">loodos.com.tr</a>	<b>Senior Android Developer</b>	<b>April 15, 2024 June 24, 2024</b>

In Loodos Technology company, I worked in various projects in Android application development and debugging processes of existing applications using current technologies.

**Kotlin, Jetpack Compose, NavHost, Datastore, DeepLink, Kotlin Reflection, OkHttp, Koin**

**OBSS Tech**

[obss.tech](http://obss.tech)

**Senior Android  
Developer (Manager 2)**

**August 8, 2022**

**March 1, 2024**

As an employee of OBSS Tech, I worked as a 2nd degree manager and senior expert software developer in the Android team preparing the investment screens in AKBANK and Akbank Yatırımcı mobile applications.

Kotlin, Java, DeepLink, Kotlin Reflection, SharedPreferences, WebView, Unit Test (JUnit, Mockito), SSLPining, OkHttp, Retrofit, Hilt, Coroutines, ProGuard, Lint, Detekt, CD/CI, Glide, WebSocket

---

**Paycore Inc.**

[paycore.com](http://paycore.com)

**Senior Android  
Developer**

**April 4, 2022**

**July 31, 2022**

At Paycore, a company that provides payment infrastructures to many companies and banks; I worked as a senior expert software developer in the development process of 3 separate Android projects, one for Android SDK, one for Android-based handheld terminals and the other for Android smartphones for the end user, using Java and Kotlin languages.

Kotlin, Java, WebView, SSLPining, AES Encryption, NFC, QR Code Reader/Creator

---

**Huawei Technologies Co.  
Ltd.**

[huawei.com](http://huawei.com)

**Senior Android  
Developer**

**18 Şubat 2020**

**21 Mart 2022**

I worked as a DTSE (Developer and Technical Support Engineer) at Huawei. I supported more than 30 well-known companies and more than 50 applications in terms of both software development and technical documentation for the spread of HMS (Huawei Mobile Services) in Turkey.

During this process, I published Turkish and English documents for HMS promotions and served as an in-house mentor to 7 new hires at different times.

Kotlin, Java, WebView, In-app Purchases, In-app Notifications, Huawei Mobile Services (HMS), Google Mobile Services (GMS), GPS Location, Notification, WorkManager

---

**Webtures Dijital Bilişim  
A.Ş.**

[webtures.com](http://webtures.com)

At Webtures, an SEO-centered software development company, I took part in the development of customer-based web and mobile applications; writing PHP-based projects from scratch and developing existing projects (Laravel, Codeigniter), writing automation and data collection systems from scratch with Python, front-end development of web projects (JS, CSS, JQuery), and planning, designing, and developing an Android application similar to Storytel upon customer request.

**Android: Java, WebView, MediaPlayer, Location Services**

**PHP: Codeigniter, Laravel**

**Python: Django**

---

**Makdos Bilişim A.Ş.**

[makdos.com](http://makdos.com)

I started working at Makdos Bilişim, a software development company based on server services, as the first software developer of the company in 2016. In the 2 and a half years I was in the position, I took part in the establishment of the software team and the systematic separation of the teams.

I took part in the development of Android mobile applications, web applications, smart building systems and server-side systems for the company and customer management purposes.

**Android: Java, WebView, Notifications, Glide, Picasso, SharedPreferences, SQLite**

**PHP: Pure PHP**

**Python: Django, Flask, FastApi**

---

**Mimcrea Web Yazılım  
Ticaret A.Ş.**

[mimcrea.com](http://mimcrea.com)

I worked as a full-stack web and Android software developer in a start-up company whose main office is located in Yıldız Technical University Technopark.

**Mid-Level Full-stack /  
Android Developer**

**01 Mart 2019**

**01 Ocak 2020**

**Mid-Level Full-stack /  
Android Developer**

**01 Ağustos 2016**

**01 Şubat 2019**

**Junior Full-stack /  
Android Developer**

**01 Haziran 2015**

**01 Ocak 2016**

Android: Java, WebView, Notifications, Location Services, Glide, Picasso, SharedPreferences, SQLite

PHP: Pure PHP

---

**Demsan Medya A.Ş.**

**Junior Full-stack  
Developer**

**01 Ocak 2015**

**30 Mayıs 2015**

I worked as a full-stack web developer at a start-up company in Isparta.

---

**EMC Bilişim A.Ş.**

**Junior Full-stack  
Developer**

**01 Temmuz 2014**

**31 Eylül 2014**

I worked as a PHP software developer for 3 months in a newly established software company.

## Projeler

**Bilimsel  
Bilgiler**

**100 B+**  
İndirme

**28 Nis 2016**  
Çıkış Tarihi

My first professionally published application is Bilimsel Bilgiler, which has been available on Google Play since 2016. The application contains hundreds of articles in more than 30 categories.

**Java, NotificationManager, OneSignal, Firebase Cloud Messaging, WebView, BackgroundServices, Admob, OkHttp, Glide, SharedPreferences, RecyclerView, Adapter, REST API, Json**

**Hadi Anlat -  
Kelime  
Oyunu**

**50 B+**  
İndirme

**10 May 2019**  
Çıkış Tarihi

It is a mobile game in which the narrators describe the word that appears on the screen after the category and time selection and the listener guesses it. It can be played without internet.

**Java, Admob, Android Motion Sensor (Accelerometer)**

### Doğru Kelimeyi Bil

**10 B+**  
İndirme

**9 Haz 2019**  
Çıkış Tarihi

Containing 365 words, this game is a word game in which the words that come to the screen misspelled are written correctly and the difficulty level increases as you progress.

**Java, Admob, Shared Preferences, SQLite**

### Bim - Aktüel Ürünler

**10 B+**  
İndirme

**15 May 2021**  
Çıkış Tarihi

This application, which I wrote in Kotlin, receives data from a REST API I wrote in Python and prints it on the screen.

**Kotlin, GMS, HMS, Admob, ViewPager, TabLayout, Retrofit, Glide, Picasso, REST API**

### Ülke Bayrağı Tahmin Et

**100+**  
İndirme

**27 Nis 2024**  
Çıkış Tarihi

This application, which I prepared for both iOS and Android with Kotlin and Compose Multiplatform, is a game that takes country and flag information from a REST API that I wrote myself in PHP language and offers multiple options to the user and waits for the user to give the correct answer.

**Kotlin, MVVM, Compose, Compose Multiplatform, Ktor, Koin, Coil, Dependency Injection,**

### Android (Kotlin, Java)

- MVVM
- Clean Architecture
- Compose Multiplatform
- Unit Test (Mockito, JUnit)
- Hilt
- Kotlin Coroutines
- Jetpack Compose
- ViewBinding, DataBinding
- LiveData, Flow
- OkHttp, Retrofit, Ktor
- Glide, Picasso
- SharedPreferences, SQLite, Room DB
- NavHost, Navigation Graph, DeepLink
- Optimization (Minify, Shrink, ProGuard)

### Diğerleri

**Agile, Scrum, Kanban, Atlassian, Git, Bitbucket**

#### Back-end

Python (Django, Flask, RestApi)  
Php

#### Front-end

HTML, CSS, JavaScript, JQuery

#### UI Design

Adobe Photoshop

#### Server

Centos, Ubuntu
